## **IGV is setting on a solid growth**

### **and strengthens the divisions IGV TESTLAB, IGV FOODTECH and IGV CAMPUS**

As reaction on the actual market developments IGV GmbH will concentrate its future capacity exclusively on the divisions IGV TESTLAB (test laboratory & analytics), IGV FOODTECH (bakery technology, extrusion & milling/crushing) and IGV CAMPUS (academy & consulting).

TESTLAB and FOODTECH will strengthen their position on the market by the application of latest analysers and expanded activities in the field of research. In the same time, IGV GmbH will expand IGV CAMPUS.

Marketing-, sales- and management functions will be adapted to national and international market dynamics. The responsible marketing- and innovations team will further support the development of new customer oriented products and solutions and the quicker introduction of new products. .

IGV Biotech's development and manufacturing of functional extracts from algae and plants will be extended and transferred to the division IGV Foodtech. The photobioreactor engineering and construction of IGV BIOTECH will be closed down.

„With our activities aiming on long-term growth our portfolio is better aligned on concrete market- and customer requirements and improves both sides efficiency. These steps confirm the engagement of IGV as a partner for the food industry“, says Dr.-Ing. Katrin Schreiber, Managing Director of IGV GmbH.
